SKILLS

Team Leadership
Programmer Management
Project Management
Agile Methodology

HTML5
CSS3
SCSS
JavaScript
AJAX
SVG
Canvas
Git

Web UI/UX
Responsive Web Design
Photoshop

Mac
PC
Unix

MISSION

I believe that **interactivity** can communicate better than any other media. I am attracted to the web's omni-presence as a platform, but recognize its darwinian nature. I love working **rapidly** with a tight **team** to create apps that utilize **motion**, **design**, and **meaning**ful interactions to deliver their central **message**.
